WORK EXPERIENCE

Front end developer

VavaSoftware Corp | December - Current

- Built REST API that served data, PHP (Laravel) for the backend, and VueJS for the front end. And Jenkins for the testing, Build, and Deployment of the projects. And JIRA for the scrums or tasks management, where tasks log or mapped to customize the workflows. And BITBUCKET is used to collaborate on code from concept to Cloud, build quality code through automated testing, and deploy code with confidence.
- Maintain the quality of the projects, making sure that the project is easy to use and easy to understand.
- Update the User Interface, Fixing the bugs/Errors of the projects.
- Weekly Meetings about the progress of the projects.

Front end developer

Innovations Group | May - December 2022

- Built REST API that served data, Java for the backend, and ReactJS for the front end. And Jenkins for the testing, Build, and Deployment of the projects. And JIRA for the scrum or tasks management, where tasks log or mapped to customize the workflows.
- Maintain the quality of the projects, making sure that the project is easy to use and easy to understand.
- Update the User Interface, Fixing the bugs/Errors of the projects.
- Implementation, and Methodrification. Maintenance. System Testing and Deployment: Once you verify that the project is working.
- Reviewed code and conducted testing for additional features.
- Weekly Meetings about the progress of the projects.
